Table of Contents

1. Introduction 1
1.1 Scope 1
1.2 Need for Security in ISDN 2
1.3 The Opportunity 3
1.4 Security Policies and Domains 3
1.5 Federal Role in ISDN Security 4
1.6 Privacy and Confidentiality versus Accountability 6

2. Security Architecture(s) for Open Systems 9
2.1 Open Systems Interconnection (OSI) 9
2.2 ECMA Security Architecture 16

3. Discussion of ISDN and Security 19
3.1 Overview of ISDN 19
3.2 ISDN Standards Status 29
3.3 Threats 32
3.4 The ISDN Security Environment 33
3.5 The Human Component of ISDN Security 35

4. Security Services 38
4.1 Integrity Service 38
4.2 Non-Repudiation Service 38
4.3 Confidentiality Service 39
4.4 Authentication Service 40
4.5 Access Control Service 42
4.6 Security Services From ECMA-138 for ISDN 43

5. ISDN Security Protocols and Applications 45
5.1 Security Protocols 46
5.2 Physical Layer Encryption Considerations 53
5.3 Security Applications for ISDN 57

6. Placement of ISDN Security Services 59
6.1 User-to-CPE 59
6.2 User-to-Network 60
6.3 User-to-SSA 61
6.4 User-to-User 61

7. Standards Needed for ISDN Security 62
7.1 ISDN-Specific Standards 62
7.2 Standard Security Mechanisms Required for ISDN 63
