

Apple StyleWriter II

Features

Print Quality

- 360 dpi for laser-quality printing
- Grayscale printing for sharp graphics
- 39 scalable TrueType fonts for printing in any size and a wide range of styles

Convenience

- Small, sleek design fits on any desktop
- Multipurpose tray for effortless paper feeding
- Ideal for home use
- Fast, draft-mode printing

Ease of use

- Easy, one-click installation
- Plug-and-play simplicity with any Macintosh computer
- 100-sheet multipurpose tray with automatic envelope feeder
- Three different print modes for versatility and productivity

The Apple StyleWriter II makes laser-quality printing more affordable than ever for anyone who uses a Macintosh personal computer. Ideal for business or home use, the StyleWriter II fits comfortably in even the smallest work spaces, and can be put to work immediately. Installation takes only one click of your mouse.

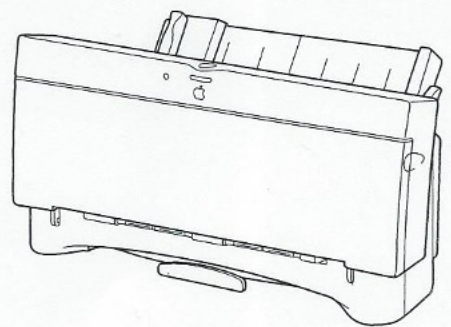

This sleek, ink jet printer offers a convenient, quiet, personal printing alternative to a networked Apple LaserWriter printer. The StyleWriter II produces laser-quality results at 360-dots-per-inch (dpi) resolution, 40 percent better resolution than standard 300-dpi printers. That means sharper text and better graphics output, making it the affordable option to a laser printer.

The StyleWriter II gives you the flexibility of printing text in a wide range of styles in any size, from tiny footnotes to bold headlines. It comes with 39 TrueType fonts

including Times, Helvetica, Palatino, ITC Avant Garde Gothic, and Symbol – three times as many fonts as most competitive products in its class.

And to make the printing process as effortless as possible, the StyleWriter II has a multipurpose tray that automatically feeds up to 15 envelopes or 100 sheets of paper. To handle diverse printing requirements, this personal desktop printer accommodates letterheads, labels, envelopes, and even transparencies for overhead projection, all from a single tray.

To enhance text and images, the StyleWriter II has Apple's GrayShare technology to give you grayscale printing comparable to the quality of more expensive Apple LaserWriter printers. For added versatility, Apple's GrayShare software also lets you share your printer with others on a network and achieve maximum Macintosh compatibility.
