### 3. SG\$PDDEL Utility

The product delete utility (SG\$PDDEL) is an interactive utility that allows Sperry Univac customer engineers to selectively delete unbundled program products from a SYSRES disk. SG\$PDDEL performs the following functions:

- o Deletes products (selected by product number) through console queries.
- o Deletes all groups associated with the selected product.
- o Deletes all SMC log entries related to the selected products.

To initiate the utility, enter:

```
RV SG$PDDEL
```

Once the utility is initiated, respond to the queries using the product number.
