

Analog ASSP

The Analog ASSP Product Line offers devices for use in a wide range of applications. This includes Audio products, Motor Drivers for low power applications, Disk Drive VFOs, Data Conversion circuits including multi-channel A/Ds and D/As, Power Supply products such as Switching Regulators and Power Monitoring circuits, and a new family of Power Management Switches. These linear products are manufactured to meet the high standard of quality and reliability that is found in all Fujitsu products.
